Qtr 1	5K	$1,07,500	60.00
Total	**479K**	**$1,13,250**	**47.62**

We understand from the Quarterly Matrix that Data Engineering Jobs are in the most volume followed by Data Analyst and Data Scientist.

Data Engineers are also getting the highest Median Yearly Salary and Hourly Salary.

We conclude that high level Data Jobs with Senior positions are valued all around the world with the employees being fairly compensated.

We also conclude that cloud engineers are less in demand but are highly compensated in big companies. Along with Machine Learning Engineers.

Overall Senior Data Roles are less hired but given fair high value compensation

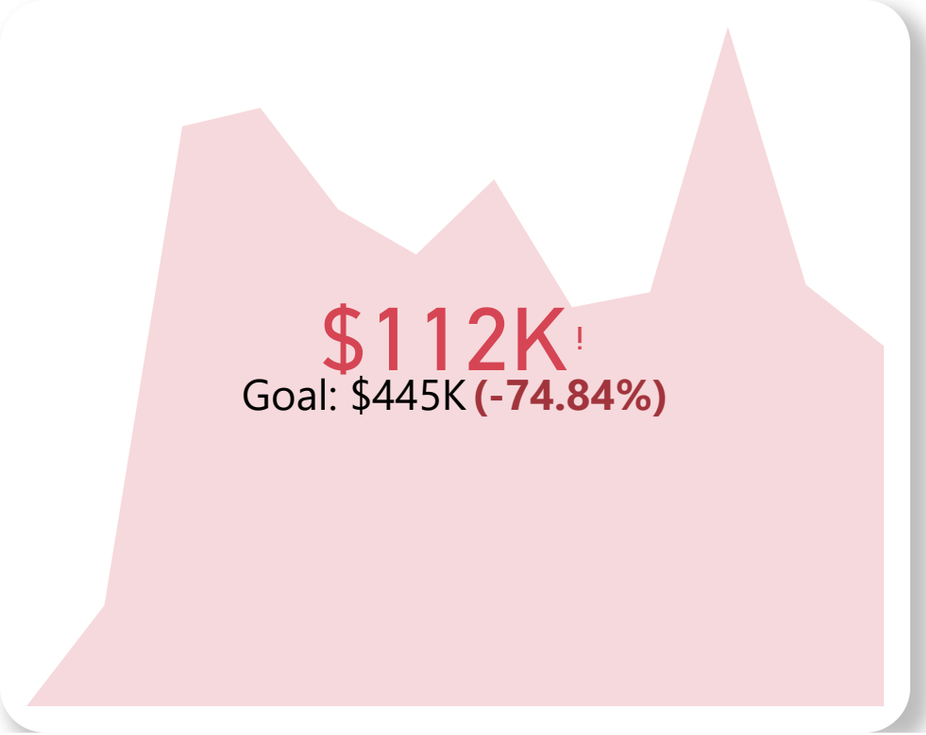
$113.3K

Median Yearly Salary

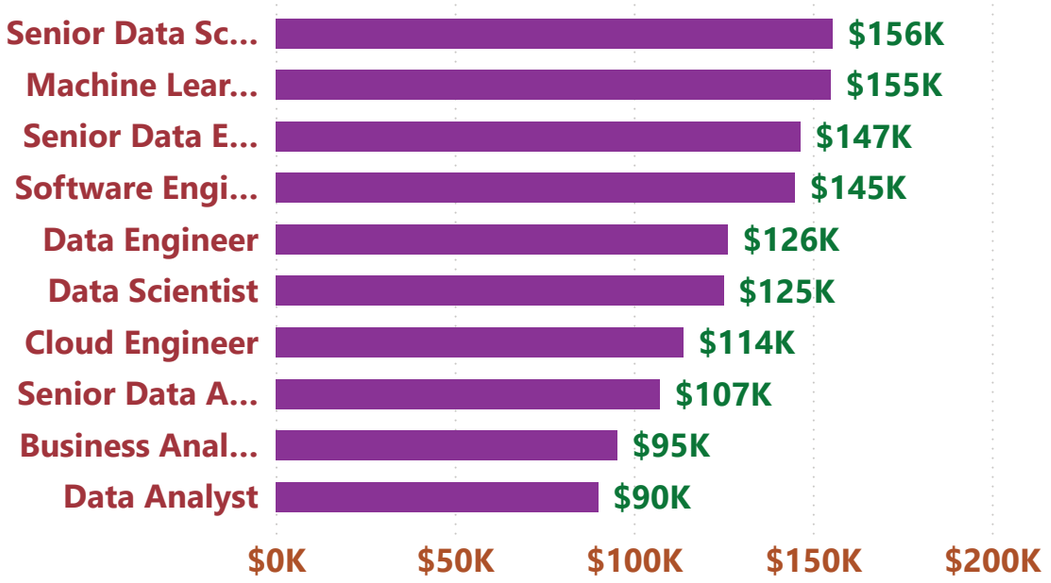
Gauge of Median Yearly Salary

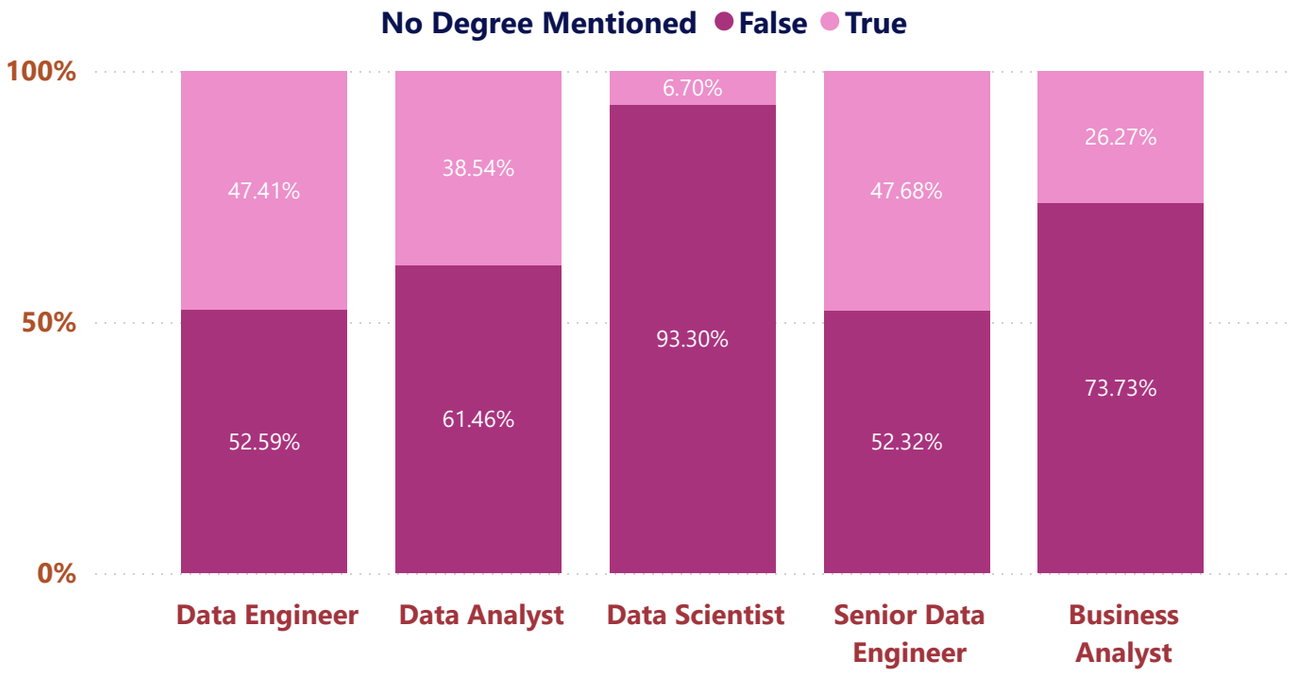
$47.62

Median Hourly Salary

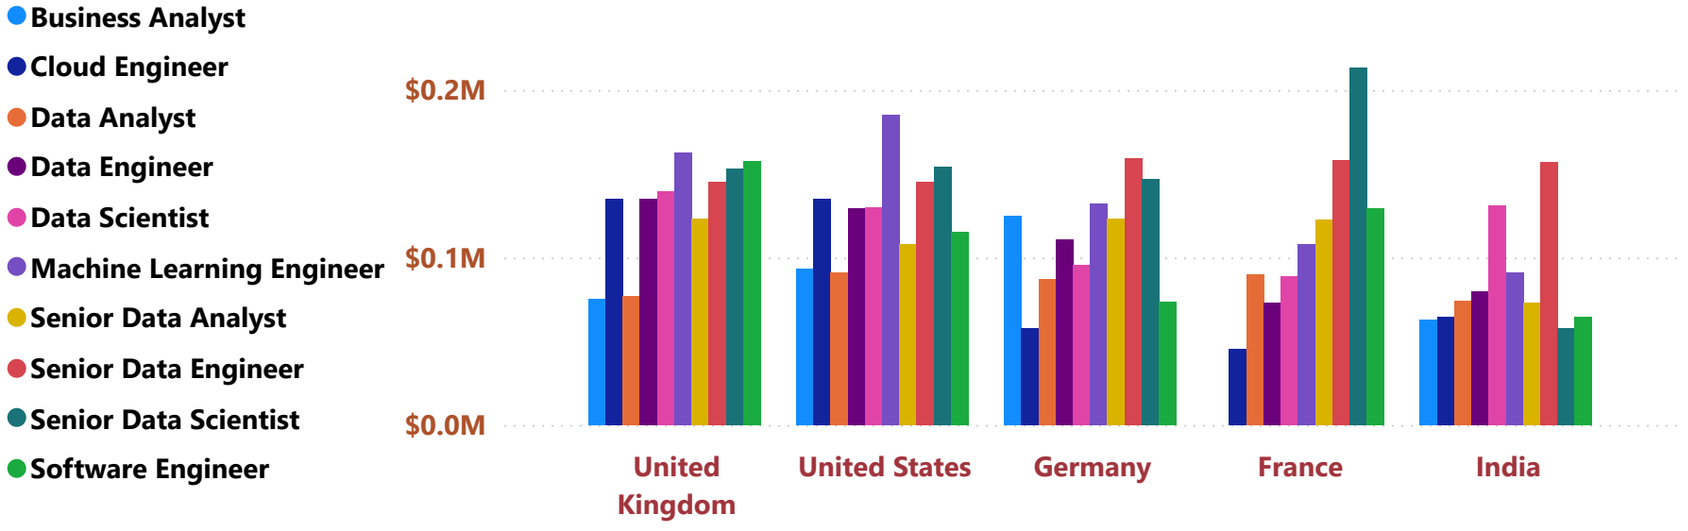


What are the Jobs with the highest Median Salary ?





What are the Jobs with the highest Median Salary in the Top 5 Countries ?



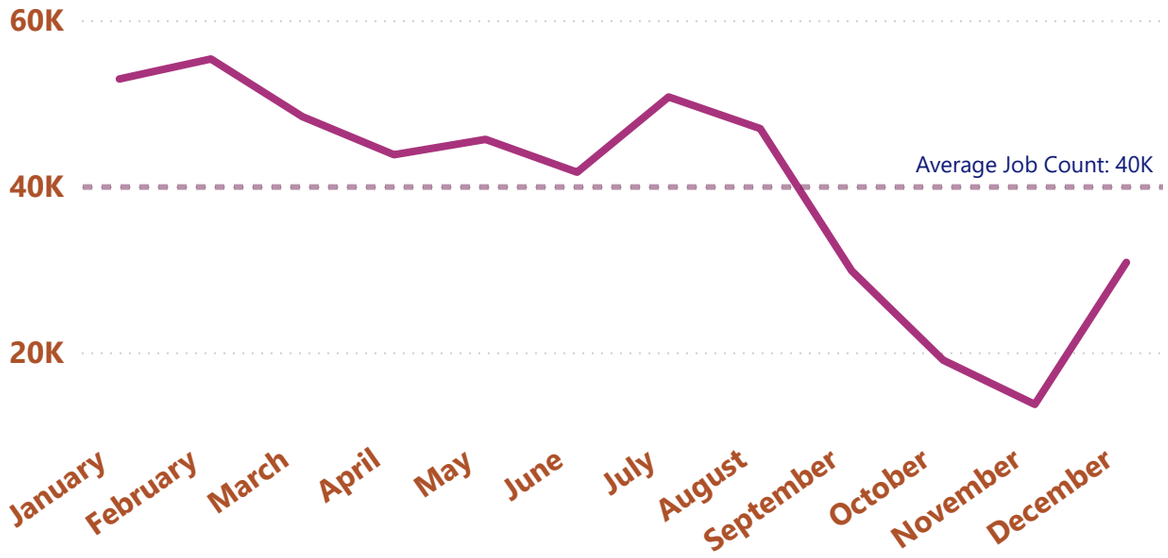
Senior Data Scientist Roles often demand Degree being mentioned in the resume.

Whereas overall Data roles cares highly about relevant high skills compared to availability of degrees.

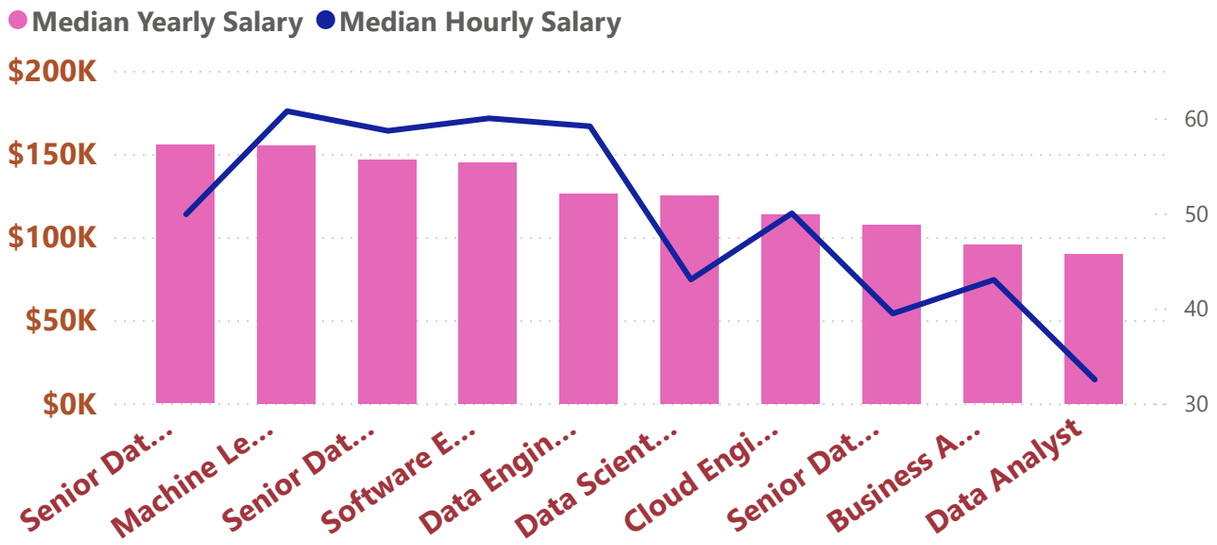
In India Senior Data Engineer and Data Scientist roles receive the highest median salary overall.

And Worldwide Senior Data Engineer roles often receive high median salary as we see from out charts

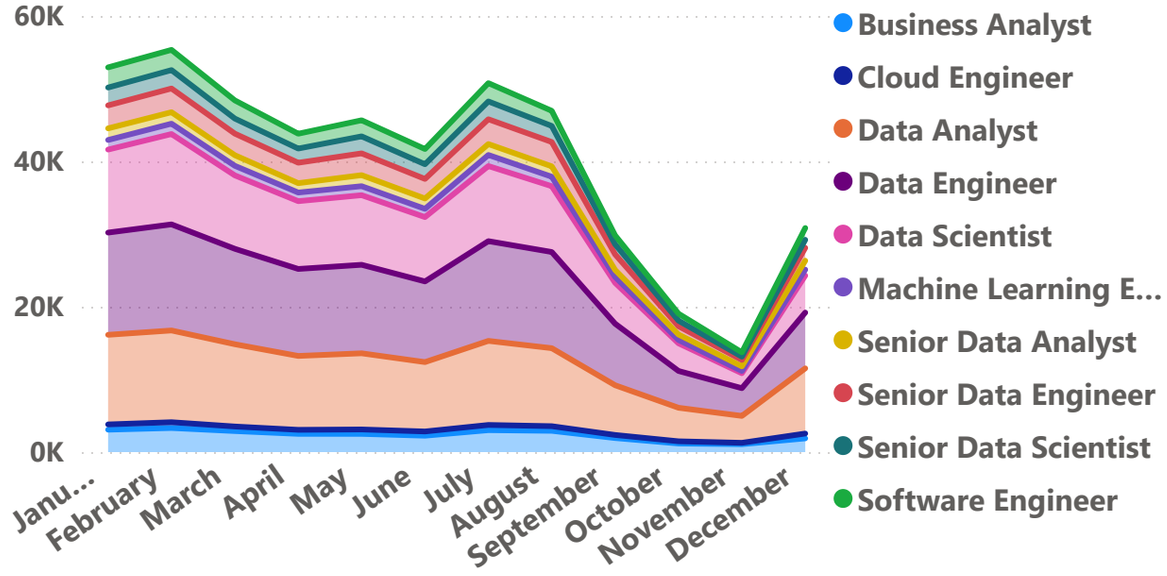
Overall Trend of Data Jobs in 2026



Salary vs Hourly Pay of Data Jobs



Trend of Various Data Jobs in 2026



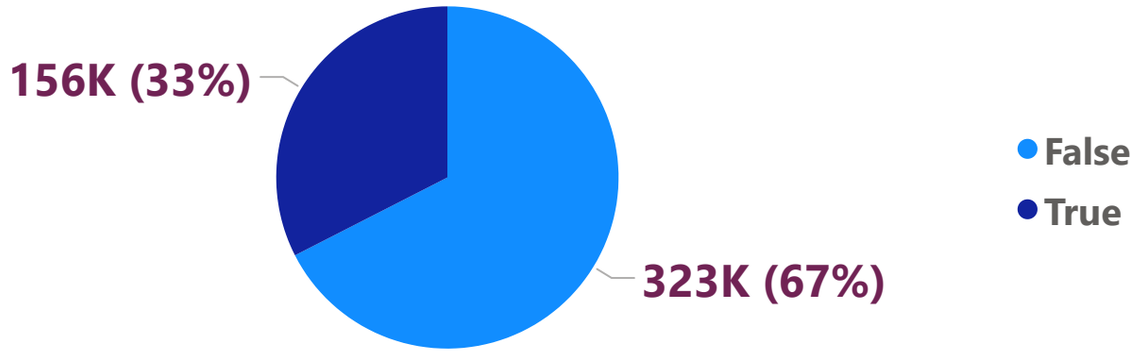
We see an overall trend of Data Position hiring around the world.

We conclude that the maximum hiring peaks during JULY-AUGUST-SEPTEMBER window and the lowest data hiring occurs during the end of quarter at NOVEMBER AND DECEMBER. This trend more or less continues throughout every job across the whole world.

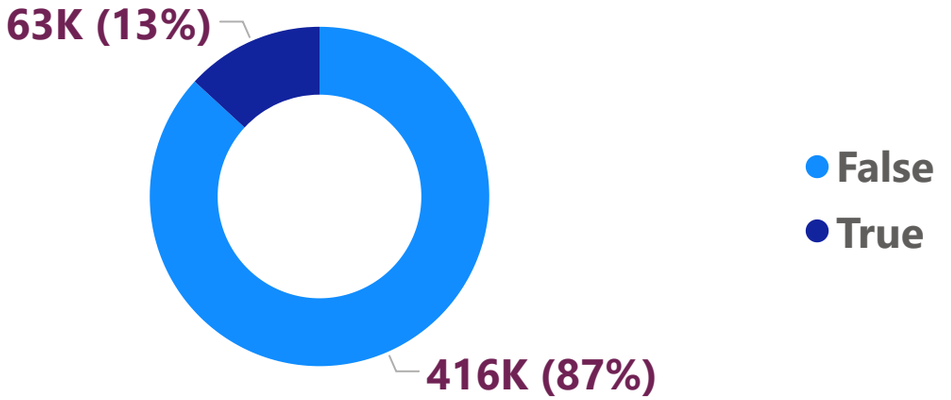
We also see a trend of yearly and hourly salary across all data jobs and we conclude that people who opt for hourly salary often receive high median salary throughout major data roles including senior data positions.

Employees should opt more for hourly salary wage for maximum gain especially in senior data positions.

What Portion of Data Jobs that have no Degree Mentioned ?



What percent of Data Jobs allow work from home ?



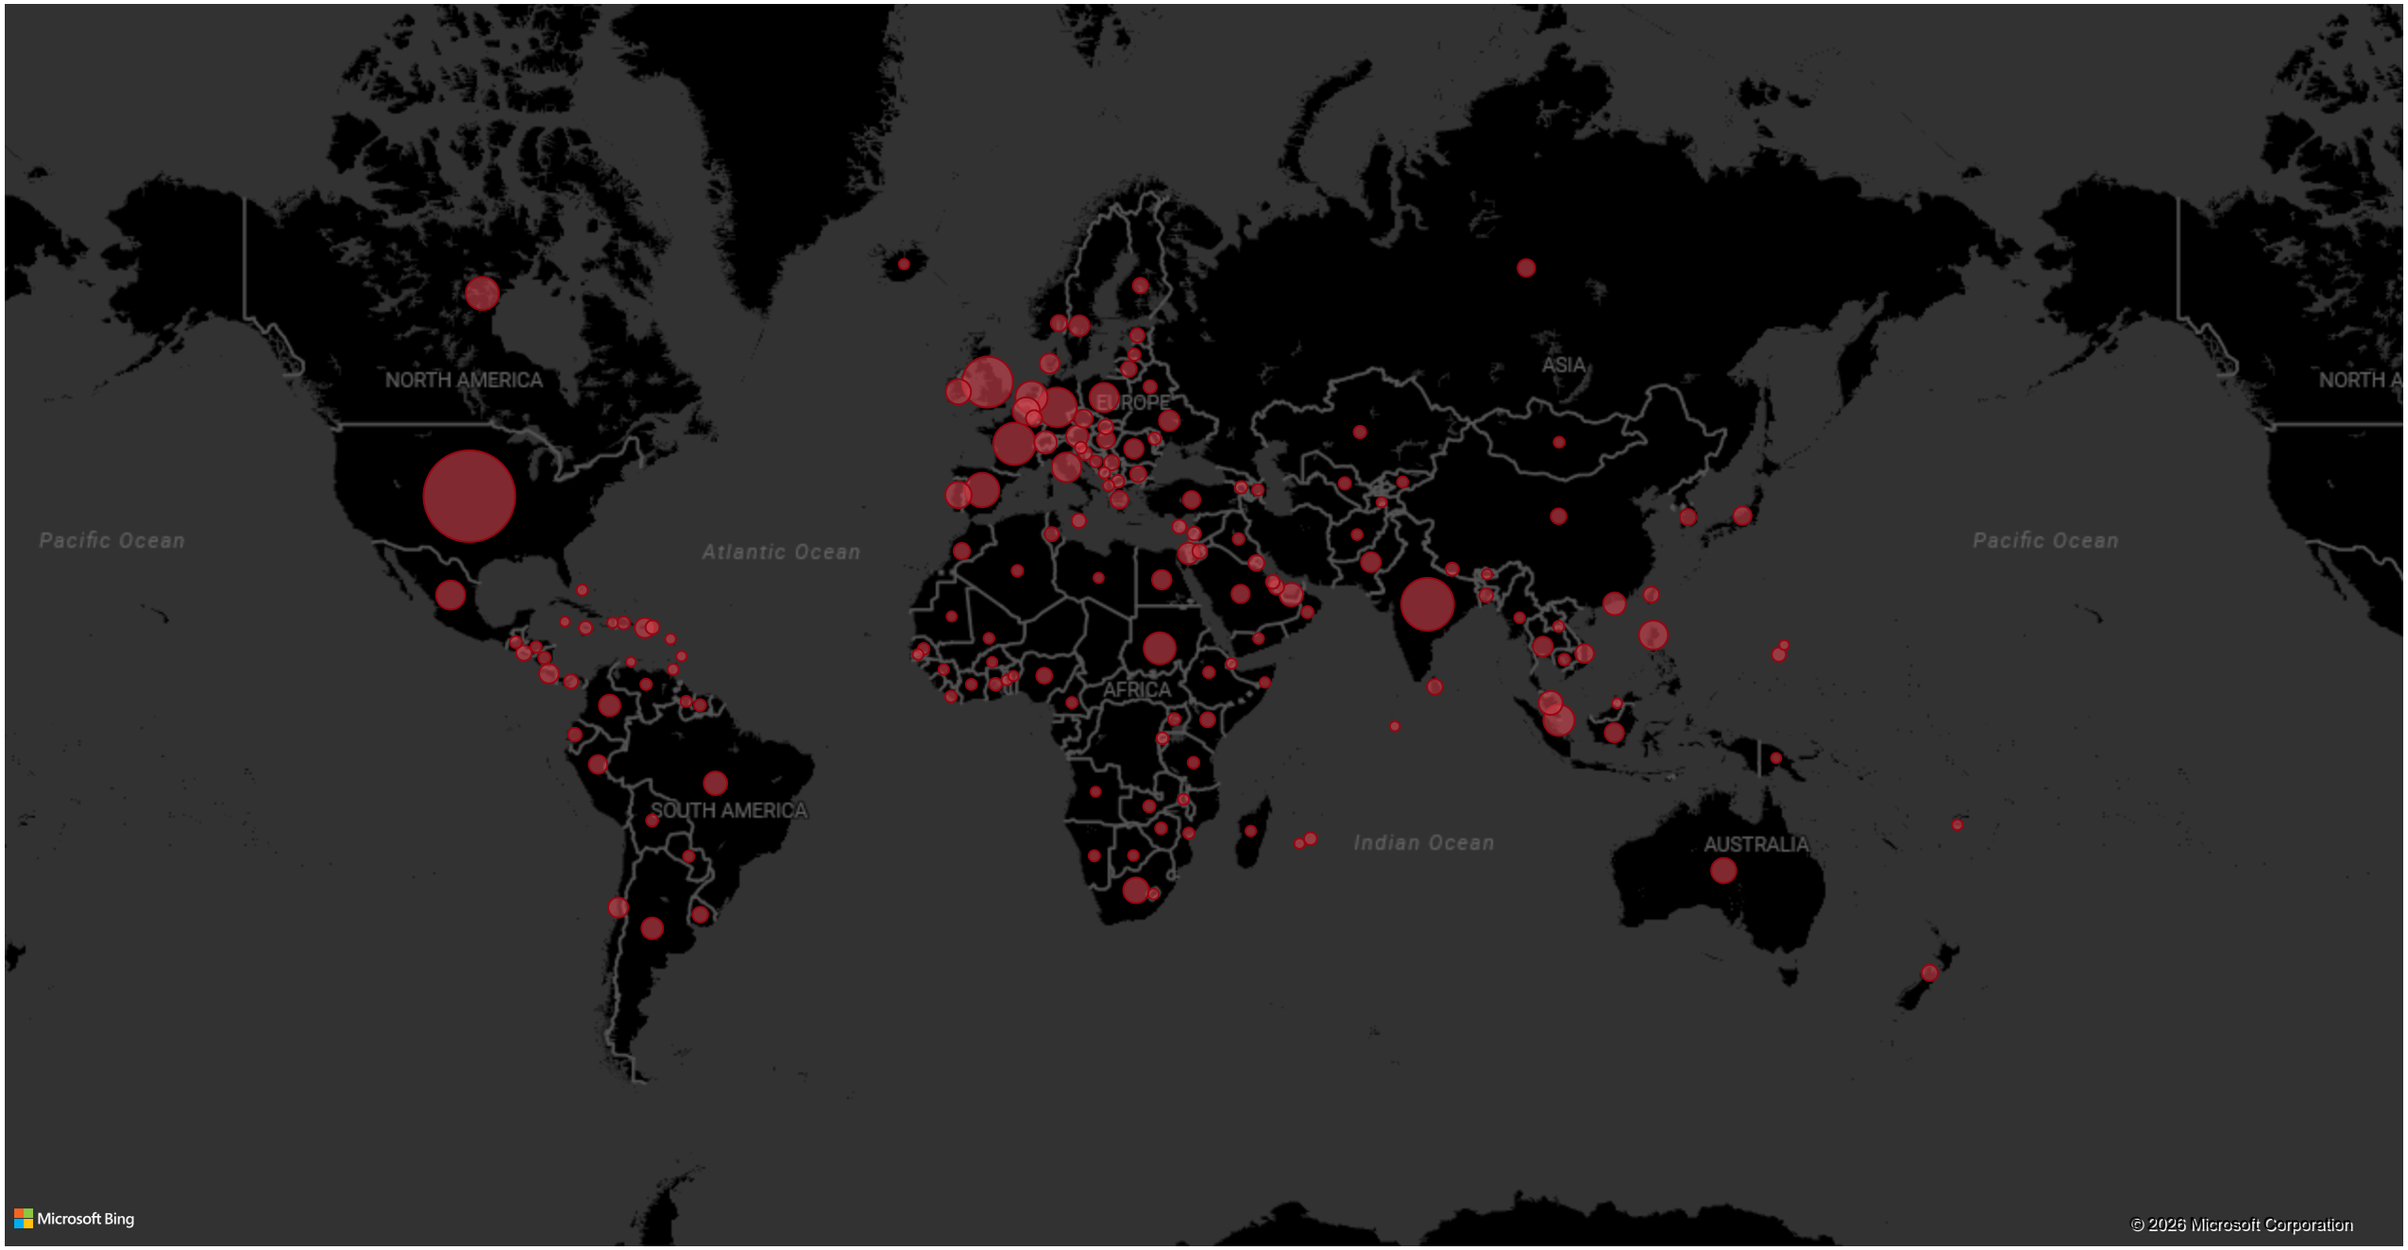
% of Total Data Jobs

We conclude from the analysis that 67% percent of Data Jobs across the world has some degree mentioned in resume. But also a significant 33% doesn't have any degree mentioned at all.

We conclude that skills are gaining high traction in Data Jobs with senior positions often demanding important relevant skills compared to degrees. This projection will increase more in the future as skills have major traction compared to degrees which are often not reliable indicators of quality and knowledge.

We also conclude that majority of the people around the world prefer to do Full time office data work with an overwhelming 91%. Even though overwhelming majority companies allow work from home.

This suggests people are coming back to offices post Covid and full time work culture is returning.

Also Data Jobs around the world are promising Full time work which suggests a healthy employment trend


Density Of Various Data Jobs Across The World
